Marine Spill Response Corporation
Attn: Don Toenshoff
220 Spring St., Ste 500
Herndon, VA 20170

Dear Mr. Toenshoff,

Your application for your Nonfloating Oil (NFO) classification letter has been reviewed and approved as outlined in the Coast Guard Oil Spill Removal Organization (OSRO) Classification Guidelines dated March 2016. Your OSRO classification number is 22; please use this number in all future correspondence to this office. If there are changes in the core equipment described in your application that would diminish NFO response capability in any port for which MSRC holds this classification, you shall report it to the NSFCC. Your company maintains several classifications which are listed in enclosure (1).

You are responsible for informing both this office and your clients of any changes to your status. Technical limitations currently prevent the additional resources listed in your application from being entered into the Response Resource Inventory (RRI) database. However, when queried, MSRC will be listed as NFO capable in the COTP zones and Alternative Classification Cities approved. In the near future, the RRI database will be amended to accept the new NFO core response equipment. At that time, my staff will contact you to ensure your NFO resources are recorded. The database can be accessed at <https://cgri.uscg.mil>. Your classifications will be listed and maintained in the OSRO Classification Matrix, which is available for review at <https://cgri.uscg.mil/rriadmin/reports/webclassificationreport.aspx>.

If you have any questions or would like more information regarding your classifications, please contact the NSFCC using the contact information found in enclosure (2).

Thank you for your participation in the OSRO Classification program.

Sincerely,

A handwritten signature in blue ink, appearing to read "W. Carter".

W. Carter
Captain, US Coast Guard
